Continuation of 4(e) Other: The scope of the claims has been changed which does not reflect the claims as originally claimed. It is noted that the newly amended claims directed to a method for forming antenna however no antenna has been formed or produced by the method. at best it is believed that the method directed to a method of forming and connecting an antenna device as originally filed rather than the the forming of antenna since no positive method limitation which indicates that the claims directed soly on the method of forming antenna (see MPEP section 819).
